

# Shotgun Pack Instructions

## **Green Gun Oil**

**FOR EXTERNAL FIREARM TREATMENT:** Apply a few drops to a gun patch, cloth or absorbent cotton and rub over entire metal surface of firearm. The metal's sheen will indicate the amount of coverage.

**FOR INTERNAL OR BORE TREATMENT:** Apply a few drops sufficient to saturate a gun patch and/or bore brush and insert in bore with a cleaning rod with a scrubbing motion.

**FOR RECESSED PARTS:** Apply a few drops directly to the recessed area and allow Green Gun Oil's wetting properties to penetrate the area.

## **Metcor 57 Gun Bore Cleaner**

**FOR INTERNAL OR BORE TREATMENT:** Apply a few drops sufficient to saturate a gun patch and/or bore brush and insert in bore with a cleaning rod with a scrubbing motion.

**FOR EXTERNAL FIREARM TREATMENT:** Apply a few drops to a gun patch, cloth or absorbent cotton and rub over entire metal surface of firearm. The metal's sheen will indicate the amount of coverage.

**FOR RECESSED PARTS:** Apply a few drops directly to the recessed area and allow Metcor 57 Gun Bore Cleaner's wetting properties to penetrate the area.

## **Metcor 71 Duck Hunter's Delight**

-Spray a light film of Metcor 71 Duck Hunter's Delight over the entire metal surface of your firearm, including sights and trigger guard.

-For additional protection "swab-out" the bore of your firearm with a cleaning patch saturated with Metcor 71 Duck Hunter's Delight.

## **Green Leather Oil**

Before applying Green Leather Oil to the entire item, apply to a small inconspicuous area to test compatibility depending on leather type. *(Not intended for synthetic leather products)*

-Clean any soil from leather before application with a mild soap and warm water. New leather requires no cleaning.

-Apply with a clean, dry cloth, sponge, brush, or fingertips and massage into leather pores.

-Allow leather article to absorb Green Leather Oil for several hours.

-Repeat steps 2 and 3 as necessary for severely dried or cracked leather items.

## **Green Stock Oil**

-Using a soft, clean cloth, apply a small amount of Green Stock Oil to the wood surface. *(Not intended for sealed wood surfaces)*

-Rub Green Stock Oil into the wood's pores using a 2" circular pattern.

-Continue to rub until you are satisfied with the wood's sheen and overall appearance.

-After application polish with a clean cloth if needed.

## **Advance Botanical Hand Cleaner**

-Apply a few drops in the palm of the hand, add water and rub hands together then rinse to remove even the most difficult soil.
